

## PLANTS THROUGHOUT THE WORLD.

Process Technology, Engineering, Project Management, Supply, Construction, Turnkey, Start-up and After Sales Service.

Bertrams Heatec Ltd, the successor of the Bertrams company, founded in 1894, is an engineering and construction company which concentrates on technologies and plants for process heating systems for any kind of processes and the related technologies worldwide.

The company offers process heating systems by using water-glycol mixtures, gases, mineral and synthetic oils, molten salts and liquid metals as heat transfer media depending on the related process requirements.

Over 3000 units have been put into service by more than 750 clients throughout the world.

Great importance is attached to the on-going programme of research and development of new applications and technologies.

Special reference lists upon request.  
Muttentz, September 2003

## REFERENCES CAPACITIES:

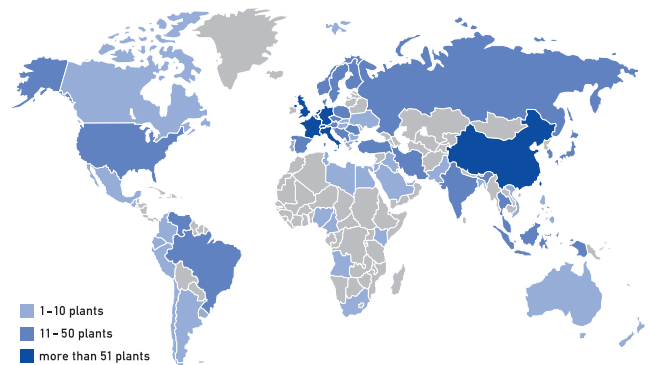

Plants smaller than 5'000 kW: approx.  
2000 units worldwide

Plants between 5'000 kW and 30'000 kW: approx.  
900 units worldwide

Plants bigger than 30'000 kW: approx.  
60 units worldwide
